Summary

Innovative full-stack developer and ML engineer with strong research foundation in AI/ML optimization, scalable system architecture, and algorithm development. Passionate about contributing to cutting-edge research and emerging technologies. Proven ability to design and implement production-grade applications with focus on performance optimization and innovative problem-solving

Education

Fr. Conceicao Rodrigues College of Engineering (CRCE) , Mumbai	<i>Expected May 2027</i>
Bachelor of Engineering in Computer Engineering CGPA: 8.68/10.0	
Sardar Vallabhbhai Patel Junior College , Mumbai	2023
12th Grade (HSC) Grade: 71.17%	
St. Francis (ICSE) School , Mumbai	2021
10th Grade (ICSE) Grade: 97.5%	

Experience

Technical Trainee – E-Cell, IIT Guwahati	<i>February – March 2024</i>
- Completed intensive training in backend architecture, scalable web system design, AI/ML applications, and startup ecosystem methodologies. - Helped businesses improve digital presence, increasing user engagement by 50%+ and contributing to 15% revenue growth.	
Documentation Head – Codelabs CRCE	<i>March 2024 – March 2025</i>
- Organized college coding contests and technical seminars and collaborated with design and backend teams for seamless execution. - Placement preparation sessions for 150+ third-year students and streamlined documentation and event workflows. - Designed session content with industry mentors to connect technical experts and students.	

Projects

LLC@FrCRCE – Course Management System

Technologies: Node.js, Express.js, MongoDB, React.js, JWT, HTML, CSS, JavaScript

- Developed a responsive full-stack platform serving 200+ students, featuring dual interfaces, JWT authentication, and real-time enrollment analytics.
- Built interactive React.js UI components optimised for cross-browser compatibility, mobile responsiveness, and page-load performance.

CancerCare AI – RAG-Powered Oncology Support Platform

Technologies: React.js, Python, FastAPI, RAG, FAISS, PostgreSQL, Llama-3.3, NLP

- Engineered a clinical NLP platform using Retrieval-Augmented Generation (RAG) for grounded, hallucination-resistant oncology support responses.
- Implemented LLM-as-a-Judge evaluation framework with rigorous safety gating; wrote production-ready code with FastAPI.

DrCropper.ai – AI-Powered Agricultural Health Management Platform

Technologies: Python, Flask, Scikit-learn, HTML/CSS, JavaScript

- Engineered a full-stack AI platform for smart farming that delivers crop recommendations based on soil and climate parameters.
- Included modular backend with model training pipeline, data preprocessing, and clean frontend for non-technical users.

Technical Skills

Programming Languages:	Python, JavaScript, Java, C, SQL
Frontend Technologies:	React.js, HTML, CSS, JavaScript
AI / Machine Learning:	TensorFlow, Scikit-learn, NLP (NLTK, spaCy), RAG
Backend Frameworks:	FastAPI, Flask, Node.js, Express.js, Spring Boot
Databases:	PostgreSQL, MongoDB, MySQL
Tools & Platforms:	Git/GitHub, Docker, AWS, Google Cloud, Jupyter, Colab, Figma, PowerBI, Vercel, Linux
Soft Skills:	Problem-Solving, Team Collaboration, Technical Communication, Leadership, Adaptability

Certifications & Achievements

- [Google Cloud Engineer](#) – Google Skills
- [AWS Cloud Practitioner](#) – AWS Academy
- [Neural Network for NLP and CV](#) – (Elite + Gold) By IIT Guwahati (NPTEL)
- [AI for Management](#) – (Elite + Silver) By IIT Madras (NPTEL)
- [Data Analytics with Python](#) – (Elite) By IIT Roorkee (NPTEL)
- [Intellectual Property Rights and Competition Law](#) – (Elite) By IIT Kharagpur (NPTEL)
- Cleared **GATE CSE 2026**
- 3rd Place** – Hackathon 3.0, IES College of Management & Research, Bandra (2025)
